

Recycling Programs

At the Rock Prairie Road Landfill we accept:

- White Goods
- Used Oil
- Used Oil Filters

A 'white good' refers to bulky appliances such as refrigerators, freezers, air conditioners, and washer/dryer units. All freon containing appliances must have the freon extracted and have a certified tag before disposal into a sanitary landfill. BVSWM's Rock Prairie Road Landfill accepts refrigerators, freezers, and air-conditioning units containing freon for disposal. Freon is extracted on-site and the unit is recycled as scrap metal. The disposal fee is \$10.00 per item.

White Good Recycling Area

At the entrance way to the landfill is a used oil collection drop off center where used oil and oil filters can be disposed of free of charge. Why should you recycle used motor oil? One 42-gallon barrel of crude oil makes 2-1/2 quarts of motor oil, while it only takes one gallon of used motor oil to make the same 2-1/2 quarts. One gallon of motor oil can contaminate one million gallons of drinking waste. What happens after you recycle motor oil? Used motor oil is reprocessed and sold as industrial burner fuel, refined into gasoline and home heating oil, or re-refined into new motor oil.
